

Service Broker

```
graph BT; Producer -- "Service registration" --> ServiceBroker[Service Broker]; Consumer -- "Service lookup" --> ServiceBroker;
```

The diagram illustrates a Service Broker architecture. At the top is a box labeled "Service Broker". Below it are two boxes: "Producer" on the left and "Consumer" on the right. An arrow points from the "Producer" box to the "Service Broker" box, with the label "Service registration" placed to the left of the arrow. Another arrow points from the "Consumer" box to the "Service Broker" box, with the label "Service lookup" placed to the right of the arrow.
